DEDICATED TO THE HEALTH OF ALL CHILDREN®

COVID-19 Update and Resources 10/2- 10/15

BREAKING NEWS

Leadership from the PA AAP has been meeting weekly with representatives from the PA Department of Health (DOH) in anticipation of the expected authorization of the COVID-19 vaccine for children ages 5 - 11.

Here's the latest update:

- FDA's Vaccines and Related Biological Products Advisory Committee (VRBPAC) is scheduled to meet on October 26th to review the EUA application for the Pfizer-BioNTech COVID-19 Vaccine for children 5-11 years old.
- The ACIP is scheduled to meet on November 2nd and 3rd.
- States should be ready to vaccinate shortly there-after
 - Ordering for pediatric vaccines will begin once FDA issues the EUA
 - Vaccine administration will begin once the CDC Director makes a recommendation based on the ACIP recommendations.
- This will be a new product with new packaging and a new national drug code (NDC).
- **Current product for adults and adolescents should not be used in children.**
- The US government has procured enough vaccine to support vaccination of this population.

In anticipation, the PA DOH has implemented a strategy to ensure that shots are in arms immediately following the EUA; see below. Registered providers will receive info directly from the DOH.

Follow us on social for real-time updates on the vaccine roll-out.

Vaccine roll-out for children aged 5-11

WHAT YOU NEED TO KNOW:

What is the timeline of the vaccine roll-out for children ages 5-11?

Registered providers will be able to place an order for the COVID-19 for children ages 5-11 with the PA DOH as soon as this **Monday, October 18.**

For the initial roll out / pre-orders, providers will need to place a minimum order of 300 doses (supply for both shots, so 150 kids). Subsequent weeks orders will reduce to 100 doses (10-dose vials, in packages of 10 vials - pending FDA authorization).

Shipments of the pre-ordered vaccine should arrive at provider sites by November 3, 2021.

Expect direct communication from the PA DOH to registered providers with further details on the pre-order process, which will occur through PA SIIS.

How to enroll to be a COVID-19 vaccine provider?

Find detailed enrollment instructions [here](#). Also, more information [here](#).

How to refrigerate this shipment?

The vaccine can be stored in a ULT freezer (-90°C to -60°C) for 6 months, and in the **refrigerator** (2°C to 8°C) **for 10 weeks.**

How will dosing and storage differ from that of the current vaccine administered to individuals 12 years and older?

The 5-11 vaccine will come in minimum orders of **100 doses** (10 vials of 10 doses). The 5-11 vaccine will be 1/3 of the adult dose (10mcg), packaged as a new product with a new NDC code. The Pfizer vaccine for ages 12+ cannot be used in place of the 5-11 vaccine.

The containers will have orange caps, distinct from the purple caps of the vaccine currently available for 12 years and older.

How will this impact CPT coding?

Vaccine Provider Information	Administered	Product	CPT Code	Age Group	Notes

See [Page #6](#) for the updated CPT codes.

How can PA AAP assist your practice through the roll-out?

Please take a moment to complete the survey below, sharing your experience with the vaccine roll-out thus far.

COMPLETE

Updates from PA & AAP

- There were 66,832 new cases in Pennsylvania since our last update on 10/1, bringing the total case count to 1,502,124 (includes confirmed and probable cases) in all 67 counties in PA. Statewide percent positivity for the week Oct. 1 - 7 stood at 9.6%--a increase from 8.6%, recorded Sept. 17 - 23. View a breakdown of cases by region, county, gender, ethnicity, etc. [here](#).
- Visit the COVID-19 [web page on AAP.org](#) to find updated resources that address clinical guidance, practice management resources, including tele-health and coding, educational resources for clinicians and families, data reports, a discussion board, details on AAP advocacy efforts, and more. For questions or comments related to the pandemic, email COVID-19@aap.org.
- As of October 7, more than 6 million children have tested positive for COVID-19 since the onset of the pandemic, representing 16.3% of all cases in states reporting cases by age. Last week, over 200,000 new child COVID-19 cases were reported, accounting for 24.8% of reported weekly cases. [Read the latest report](#).
