### Is your child due for a Well Check Visit or Immunization?

Call your pediatrician to make an appointment or discuss your options.

Pediatricians are working hard to make sure they can care for your child, while still keeping everyone safe.

**Twitter:** Staying at home keeps you and your child safe but they should still receive important well child care and vaccines. #PedsPutKids1st

**Facebook:** Pediatricians understand the importance of keeping immunizations up to date. Even during coronavirus vaccines are safe and effective and provide your child protection from other dangerous diseases. #PedsPutKids1st

### Well Child Visits During the COVID-19 Pandemic

Staying at home keeps you and your child safe but they should still receive important well child care and vaccines.

#### Newborn Visits

- Weight Check
- Feeding Concerns
- Jaundice Check
- A second heelstick for severe, but treatable diseases

#### Visits at 2, 4, 6, 12 and 15 or 18 months

- Growing bodies
- Growing brains
- Milestones
- Vaccinations

Your child is considered protected if they received vaccinations through 18 months of age.

Call your pediatrician if you have any questions or concerns.

## Do you have questions about newborn care during COVID-19?

Your pediatrician is here to help, even during coronavirus. Your child's doctor is an excellent resource for understanding your baby and your own needs, including those related to postpartum depression.

Call your pediatrician with any questions about your new baby.

## Vaccines During COVID-19

Staying at home keeps you and your child safe but they should still receive important well child care and vaccines.

- Vaccines protect your infant against 14 diseases which can cause serious illness involving major organs like the lungs and brain.
- Many of these diseases may be carried by others at home or in the community without their knowledge.
- To keep you and your child safe, clinics may offer separate times and/or spaces for vaccine only visits.
- Vaccines can be given safely when your child is sick, as long as temperature is less than 101°F.

Your child is considered protected if they received vaccinations through 18 months of age.

Call your pediatrician if you have any questions or concerns.
